| <i>Width</i> | 140cm |
| <i>Usage</i> | upholstery / screens / wall panelling |
| <i>CTA Performance Rating</i> |  |

CTA PERFORMANCE RATING

Tests conducted by independent testing laboratories indicate that FEEL met or exceeded the performance guidelines for HEAVY DUTY COMMERCIAL USE, as determined by the CTA (Commercial Textile Association of Australia and New Zealand).

DESIGNED BY VIVID TEXTILES

FEEL was designed by the VIVID Textiles Design Studio.

OPTIONAL EXTRAS

The VIVID Textiles Design Studio is available to develop custom designs and colours to cater for your special requirements. Please contact your nearest VIVID Textiles office for pricing and minimum order quantity details.

COLOUR VARIATIONS

Due to the nature of textiles, colour differences between rolls and batches of fabric are unavoidable. Therefore it is not always possible to obtain an exact colour match to the fabric displayed in our sampling. All fabric will be supplied within commercial tolerance.

FABRIC CARE

Do not remove any part for separate cleaning.

Protect from direct and reflected sunlight. Vacuum regularly using low suction and a soft brush.

Rotate reversible cushions regularly. Professional cleaning recommended.

For detailed instructions please refer to CTA Care Code 1 (available from our website).

ENVIRONMENTAL BENEFITS

FEEL contains 80% rapidly renewable content (wool and alpaca). Environmentally Improved Production Process: the manufacturer has reduced water and energy use and recycles waste. FEEL can be recycled or will biodegrade in the right conditions.

ENVIRONMENTAL CARE

VIVID Textiles is an environmentally responsible company and reducing wastage is our concern.

When you no longer need this sample card, please mail it to your nearest VIVID Textiles office or phone for collection so this resource can be reused.
